

Welcome to Pediatric Neuropsychology Associates

Understanding Minds. Supporting Growth.

At Pediatric Neuropsychology Associates PLLC, we provide comprehensive, individualized neuropsychological assessments for children, adolescents, and young adults. Our goal is to empower families with insights into their child's unique strengths and challenges, turning understanding into practical strategies for success at home, school, and in the community.

When to Consider Our Services

If you're wondering whether your child might benefit from an evaluation, here are some common signs:

- ✓ **Learning Challenges:** Struggles with reading, writing, or math despite support; bright child not meeting expectations; frustration at school without clear cause
- ✓ **Attention & Focus:** Difficulty concentrating or finishing tasks; easily distracted or impulsive
- ✓ **Social & Communication:** Difficulty with social cues or friendships
- ✓ **Developmental Delays:** Missed milestones in language, motor, or social skills
- ✓ **Medical History:** Epilepsy, diabetes, brain injury, premature birth, or chemotherapy/radiation treatments

How a Neuropsychological Evaluation Helps

A neuropsychological evaluation helps families understand why a child is struggling and what supports are most likely to help. Families often gain:

- Clear insight into a child's unique strengths and areas of need
- Answers to complex or long-standing learning, attention, or behavioral concerns
- Personalized, actionable recommendations for school, therapy, and daily functioning
- Tools and documentation to support decision-making and advocacy

Who We Work With

- **Ages:** 12 months to 22 years
- **Developmental:** ADHD, autism, learning disabilities, intellectual disability
- **Medical:** Brain injury, epilepsy, childhood cancers, premature birth
- **Genetic:** Down syndrome, Fragile X syndrome, Turner's syndrome

Services We Offer

- **Free Initial Phone Consultations**
- **Comprehensive Neuropsychological Evaluations (Ages 5+)**
- **Early Childhood Neurodevelopmental Evaluations (Ages 0–4)**
- **Parent & School Consultations**
- **Legal Consultations**

About Dr. Moshe Maiman, PhD

Dr. Maiman is a licensed pediatric neuropsychologist practicing in Florida and New York with experience at NYU Langone Health, Boston Children's Hospital/Harvard Medical School, University of Chicago Medical Center, and Children's Hospital of Philadelphia.

His approach is holistic—seeing each child as a whole person, not just symptoms or test scores. He focuses on practical, evidence-based strategies that support growth at home, school, and in everyday life, helping families and professionals work together to guide each child toward their full potential.

Insurance & Payment

This practice does not bill insurance. All services are private-pay, due at time of service. A superbill can be provided for out-of-network reimbursement. Contact your insurance provider to understand your benefits before beginning services.

Our Mission & Approach

We provide compassionate, evidence-based evaluations that focus on the whole child—their strengths, potential, and individuality.

What Sets Us Apart

- **Whole-Child Approach:** We look at the full picture—not just challenges, but more importantly, your child's unique abilities and potential.
- **Strength-Based Focus:** We emphasize your child's strengths as the foundation for growth and learning, fostering resilience and building self-advocacy skills.
- **Personalized Recommendations:** We provide clear, practical strategies for home, school, and daily life—customized to meet your child's real-world needs.
- **Compassionate Care:** We offer a safe, welcoming space where your family is truly heard. Our approach is grounded in empathy, understanding, and respect—guiding you with warmth and clarity every step of the way.
- **Collaborative Support:** We work closely with schools, therapists, and healthcare providers to ensure consistent, coordinated support across all areas of your child's life.

What to Expect

Following your initial phone consultation, we'll schedule testing sessions tailored to your child's age and needs:

- 1 Intake Interview**
We gather detailed history about your child's development, concerns, and goals.
- 2 Individualized Testing**
Your child completes assessments in a comfortable, supportive environment.
- 3 Feedback Session**
We review results together and discuss findings in detail.
- 4 Written Report**
You receive a comprehensive report with personalized recommendations.

Our goal is to ensure you leave with **clarity, confidence, and a practical path forward.**

For Referring Professionals

We welcome referrals from educational and healthcare providers. Our detailed reports include clear, actionable recommendations to support educational, therapeutic, and medical treatment planning. We value collaboration and communication to ensure that each child's care is well-coordinated and effective across home, school, and clinical settings.

Common Referral Questions

- Differentiating ADHD, learning disorders, or emotional factors
- Assessing the cognitive impact of medical or neurological conditions
- Evaluating school readiness or academic placement
- Providing expert opinions for complex or unclear diagnoses

Ready to Take the Next Step?

Thank you for considering Pediatric Neuropsychology Associates as a partner in your child's care. Whether you are a family member, pediatrician, educator, or therapist, we are here to support you.

- If your child or patient may benefit from a neuropsychological evaluation, we offer a **free initial phone consultation** to discuss your concerns and determine the best next steps.
